Salon

Touch of excellence

BENTLON

Vapozones

Modern design, practical and complete!

- Modern and sleek design
- Steam function adjustable from 1 to 9 steam strengths
- Optimal ease of use due to the rotating steam arm
- Practical use due to top platform
- Functions perfectly with normal tap water
- Optional power socket, storage space and worklamp holder starting from Gold

From a starter model with its basic steam functionality to the advanced steamer with a series of extras. The Bentlon vapozone models form a complete range in which each model offers extra functionality or options. This gives every beautician the opportunity to choose a Bentlon vapozone with the options that suit her salon best.

Vapozone Bronze

Starter model of superior quality. The Bentlon vapozone Bronze, just like the other vapozone models from the Bentlon range, is equipped with a rotating steaming arm. This allows the steam head and the steam direction to be easily adjusted. The Bentlon vapozone Bronze has a reservoir of 1.75 liters and one easily activated steam strength. The Bentlon vapozone Bronze is also equipped with a felt ring in the steam head. Drip some essential oil on this ring for an extra relaxed experience.

Vapozone Silver

Basic model with the possibility for variation. This variation is reflected in variable steam strengths, the herbal reservoir and the ozone function. These options make it possible to adjust the steam program to

your treatment. The herbal reservoir in combination with the felt ring offer the possibility to add an extra dimension to the treatment and to support your products. The ozone function is especially suitable for impure skin and can be activated with one simple touch.

Vapozone Gold

Top model with various extra options! In addition to the regular steam, ozone and herbal functions, the Bentlon vapozone Gold has a stand-by function. The water in the reservoir is kept at the right temperature so that one of the 9 steam strengths can be switched on at any desired moment. The stand-by function prevents you from having to take the warm-up time into account during your treatment. The integrated power socket in combination with the stable top plate makes it possible to connect additional

beauty equipment without cables being visible. In addition, a worklamp holder is supplied as standard with the Bentlon vapozone Gold. This complete concept makes the Bentlon vapozone Gold ideal for even the smallest spaces.

Vapozone Platinum

All-in-one model of superior quality. All options of its predecessors can be found in the Bentlon vapozone Platinum. The extra storage drawers make it possible to store accessories and supplies within reach. The design of the Bentlon vapozone Platinum is sleek, modern, innovative and above all practical. This makes the Bentlon vapozone Platinum the top model of the Bentlon vapozone range.

Instrument tables

The Bentlon instrument tables enable you to have the products you need for a treatment within reach. Thanks to the casters, the instrument tables are easy to move, even during a treatment. The instrument tables are available with two or three shelves. If desired, a drawer can be attached under one or more shelves. The instrument tables are also suitable for placing equipment in or on. A worklamp can also be attached to the instrument table with the help of a special holder.

Ref. 60305

Bentlon Bronze cabinet

The Bentlon Bronze cabinet range consists of high quality cabinets with open compartments. Choose from high and low models and between narrow and wide models. Depending on the model, the cabinet has three or 4 open compartments. Optionally, a towel holder, if desired in combination with a worklamp holder, can be attached to the cabinet.

Bentlon Silver cabinet

The Bentlon Silver cabinet range has a sleek design with multiple drawers, suitable for any salon design! All drawers are equipped with a push-to-open system. The different sizes each offer a large drawer of 30 centimetres and, depending on the model, three or four smaller drawers of 15 centimetres each. The cabinets within the Silver range are equipped as standard with two power sockets on the rear, which are perfect for connecting professional equipment. In addition, a Silver cabinet is equipped with a towel holder as standard. If desired, a worklamp holder can also be installed. Optionally, an extra towel holder can be chosen.

Bentlon Gold Cabinet

The Bentlon Gold cabinets are a true eye-catcher. The top drawer of the Bentlon Gold cabinets is designed to be open, making it perfect for use in combination with your equipment. Depending on the model, the cabinet also has two or three closed drawers, one of which is equipped with UV light to keep your instruments sterile. All drawers are equipped with a push-to-open system. The Bentlon Gold cabinets are standard equipped with a towel holder and a worklamp holder. In addition to the 2 power sockets at the rear of the cabinet, the ease of use is optimal due to the extra socket inside the cabinet. The highlight of the Bentlon Gold cabinets is the LED lighting in the logo on the top. Optionally, the cabinet can be expanded with an extra towel holder.

BENTLON

Work lamps

To have the perfect visibility!

- Professional worklamps
- Varied assortment
- Enlarge to minimal 1,75x
- High quality because of glass, lens, light and construction

A work lamp is part of the basic equipment of a beauty salon. The quality is determined by the quality of the glass, the lens, the light and the construction of the lamp. An advanced work light is the best choice for long-term, intensive use. Good light, a good color rendering of the skin and no distorted image are required. If the worklamp only serves for extra light, then a basic version is sufficient.

Bentlon Silver

The Bentlon Silver loupelamp is equipped with two individual lamps of 13W each. The loupelamp illuminates the surface from the side, resulting in a shadow-free light. The lamps can also be used separately. The glass is enlarged to a maximum of 1.75x and thanks to the Free Motion system the lamp can easily be placed in the desired position.

Luxo Wave LED

This rectangular work lamp with a wide spectrum gives a very comfortable and clear image. The Wave LED offers shadow-free magnification with light coming from two sides, as well as three-dimensional magnification with light from left or right. Moreover, this worklamp offers an excellent color rendering and the possibility to dim the lamps.

Luxo Circus LED

This professional worklamp has a large lens finished with aluminum and a very flexible self-balancing arm with easily adjustable hinges. Due to the circular, dimmable LED module, shadows are almost completely eliminated and the light intensity can be adjusted as desired. The LED lighting offers a clear and undistorted image and an excellent color rendering.

Waldmann LED

The Waldmann LED has everything a magnifying lamp should have: a robust magnifying glass with 1.85-fold magnification, a ring of LED lights, a 90 centimetres long arm and a 16 centimetre lens. Special about the Waldmann LED is the large light field in daylight quality, the excellent lens and the maintenance-free lifespan.

BENTLON

Beauty devices

Ref. 60491

Bentlon Micrabrader Gold

The Bentlon Micrabrader Gold is the latest development of Bentlon in the field of microdermabrasion. A lot of attention has been paid to the development of a beauty device with which excellent results can be achieved, but which is also practical and hygienic in use and maintenance.

The Bentlon Micrabrader is a device that gently and effectively dilutes the top layer of the stratum corneum (horn layer). These small, deliberate scrapes initiate the skin's natural healing process to regenerate the skin, creating new and healthy tissue that replaces the damaged tissue.

The Bentlon Micrabrader Gold can be used to tackle and minimize various skin imperfections. Microdermabrasion treatments

are most commonly used to fade lines and wrinkles and to give the skin a younger appearance. In addition, treatment with the Bentlon Micrabrader is also perfectly suited to visibly reduce other imperfections such as scars, stretch marks (pregnancy stretch marks) and pigmentation spots.

Choose the desired settings via the digital display, depending on the skin type and the purpose of the treatment. The Bentlon Micrabrader Gold offers the possibility to save up to 4 preferred settings in order to start a certain treatment quickly and easily. Via the display you can also regulate the pressure of the crystal flow and activate the automatic cleaning function by means of the 'clean'

button.

The crystal flow starts when the vacuum circuit is closed. This is easily done by placing the head of the handpiece on the skin. As soon as the head is no longer in contact with the skin and the vacuum circuit is interrupted, the crystal flow stops immediately. This has the advantage that crystals are never blown into the treatment room. You only have to concentrate on your client and the skin you are treating.

Ref. 60800

OrbTM by Bentlon

The OrbTM by Bentlon is a relaxing, exclusive and luxurious upgrade for every facial, foot and body treatment. The OrbTM by Bentlon offers countless options for a wide range of treatments.

With the OrbTM by Bentlon you can heat wax, paraffin and other products so that they can be applied to the skin evenly and with a pleasant temperature. The OrbTM by Bentlon is heated by the docking station within 15 minutes and retains its heat for 45 minutes. Thanks to its handy design, the Orb can also be held in the hand during treatment.

Pre-filled wax and paraffin cups, Orbserts, are available for use in combination with the Orb. The included empty cups can be used to heat any other desired product before applying it to the skin such as massage oil, a cream mask or foot cream. The heat stimulates blood circulation and ensures that the active substances can penetrate deeper into the skin. Moreover, the pleasant warmth enhances the feeling of total relaxation.

Give your body treatments an extra dimension with heated massage oil, use the paraffin Orbserts in combination with a cream mask

during the facial treatment and finish your foot treatment with wonderfully heated foot cream.

Ref. 65310

CryoPen O Blue by Bentlon

Cryotherapy with the CryoPen O Blue by Bentlon! The definition of cryotherapy is: "controlled destruction of unwanted tissue through the extremely precise application of extreme cold".

By applying cryotherapy, various skin irregularities can be treated effectively, accurately and painlessly by means of controlled freezing.

The CryoPen is suitable for the treatment of pigmentation spots, angiomas, stalk warts and ordinary warts.

Cryotherapy has several advantages over the

traditional treatment methods. Due to the different caps, treatment with the CryoPen is extremely precise. Therefore surrounding healthy skin tissue does not get damaged. In addition, the constant temperature of -89°C and the highly accurate, local treatment ensure that the skin sensitivity of the patient is minimized, making the treatment rather painless. Finally, treatment with the CryoPen is very sterile because there is no skin incision. No bleeding occurs, so there is no risk of infection. Cryotherapy does not cause any unpleasant side effects, is safe to use and does

not cause scars. Many doctors, dermatologists and pedicures already work with cryotherapy.

Ref. 60435

Bentlon DermaPerfect

Perfect skin with the Bentlon DermaPerfect. Treat cosmetic skin irregularities such as wrinkles, fibromas, telangiectasies and pigment and age spots successfully, effectively and quickly with the Bentlon DermaPerfect. With the DermaPerfect, specific skin imperfections can be treated individually with an immediate result. The treatments are easy to carry out and safe. The Bentlon DermaPerfect treats the skin imperfections very locally so that the surrounding skin area is not damaged during the treatment.

The Bentlon DermaPerfect is a device that is controlled by a monopolar RF signal. This 4 MHz radio frequency signal causes vibrations that concentrate at the tip of an uninsulated needle. A technique that has been used in the medical industry for more than 30 years.

These vibrations create heat in the skin that is used to treat the skin irregularities.

The Bentlon DermaPerfect is a compact and user-friendly device. The display on the top of the device shows the various functions and settings. Various treatments are pre-programmed in the menu, so that only the desired treatment needs to be selected, after which the Bentlon DermaPerfect automatically chooses the correct settings and percentages. This way you can start the treatment in a jiffy and you don't have to perform unnecessary actions.

Ref. 50480

High frequency device

The Bentlon high-frequency device is the device par excellence for the treatment of thickened or impure skin. The high-frequency currents create sparks inside the glass electrode. These result in a slight rise in temperature of the skin, which raises the blood circulation.

The skin is stimulated and active ingredients are absorbed better. Moreover, the ozone has an activating and disinfecting effect on the skin.

Ref. 50570

Ultrasonic cleanser machine Gold

The Bentlon ultrasonic cleaner heats the liquid in the tank to 65 ° C, so that even greasy instruments are cleaned more efficiently. High-frequency vibrations generate millions of small air bubbles that release the dirt particles. The extra powerful Bentlon ultrasonic cleaner Gold, with a capacity of 2.6 liters, removes dirt and grease from even the smallest instruments. The extra fast cleaning time of 90 seconds to 8 minutes makes this the perfect ultrasonic cleaner for frequent, professional use.

Ref. 50625

Hot Cabinet Silver

No more bumbling with water and compress bins thanks to the Hot Cabinet Silver. The Hot Cabinet Silver has a capacity of 18 liters, which means that 80 to 90 compresses can be heated simultaneously. When switched on, the towel warmer automatically starts the heating process. When the set temperature is reached, the towel warmer is automatically kept at the desired temperature. The micro-computer, which also controls the temperature, protects the Hot Cabinet Silver against overheating.

Tabourets

Ref. 60150

For the right working position

- Varied assortment
- Ergonomic design
- Adjustable in height
- With or without backrest
- In matching colour with treatment chair

Choosing the right stool

Stools are available in various designs. A stool is very important for the correct work posture and should be comfortable. This is a purely personal thing. In the Bentlon stool range you will find exactly the right stool for you and a wide selection of cover colours. All stools are stable and have five legs with castors. The height adjustment is continuous with a gas strut. On most models the back support can be adjusted both in height and depth so that you can always adapt the perfect sitting position.
